PROFESSIONAL SUMMARY

Analytical Web Developer and Data Scientist with strong technical foundations in scalable web architectures, microservices, and machine learning. Experienced in architecting real-time applications using Node.js, Next.js, Socket.IO, Redis, and RabbitMQ. Possesses formal training in end-to-end data science methodologies alongside practical expertise in full-stack web engineering. Passionate about leveraging data-driven approaches to solve complex software problems and deliver seamless user experiences.

EDUCATION

Savitribai Phule Pune University, Pune, India

Expected June 2029

B.Tech in Computer Science and Engineering | CGPA: 8.12

Relevant Courses: Data Structures Algorithms, Operating System, Digital Logic, OOP

PROJECTS

Real-Time Chat Application (Microservices)

Aug-Sept 2026

Node.js, TypeScript, Next.js, Socket.IO, MongoDB, Redis, RabbitMQ, Cloudinary

- Architected a microservices-based real-time chat application with dedicated User, Chat, and Mail services communicating via **RabbitMQ** message broker.
- Implemented **bidirectional** messaging via Socket.IO, achieving **sub-100ms real-time** latency across concurrent sessions.
- Integrated **Redis** for session caching and **JWT**-based authentication for secure, stateless user authorization across services.
- Built a **modern responsive frontend** with **Next.js 16** and **Tailwind CSS**, featuring Cloudinary-powered media uploads for image sharing.

E-Commerce Sales Analysis Dashboard

July 2026

Power BI, Power Query, DAX, Data Modeling, Data Visualization, Excel/CSV

- Designed an **end-to-end Power BI dashboard** to track sales performance, profit margins, and regional revenue trends across complex datasets.
- Transformed and modeled multi-source data using **Power Query** to establish efficient star-schema data structures for seamless analysis.
- Implemented dynamic visual features like interactive slicers and drill-down filters to deliver actionable, data-driven business insights.
- Modeled multi-source sales datasets into a star-schema structure, analyzing **10k+ transactions** to identify revenue drivers.

RAG-based AI Teaching Assistant

July-Aug 2026

Python, RAG, OpenAI API / LLM, Whisper, Vector Embeddings, Pandas, Joblib

- Architected a **Retrieval-Augmented Generation (RAG)** system to transcribe, chunk, and index video course materials for contextual Q&A.
- Integrated **OpenAI Whisper** to extract accurate, timestamped audio transcriptions from MP3 chunks for structured processing.
- Generated vector embeddings and managed metadata chunks using **Pandas** and **Joblib** to retrieve relevant course context efficiently.
- Designed tailored RAG prompts for LLMs to generate precise, timestamp-cited answers based on top matching video segments.

TECHNICAL SKILLS

Languages	Python, JavaScript, HTML, CSS, TypeScript
Frameworks & Libraries	Node.js, Next.js, React.js, Socket.IO, Tailwind CSS, Pandas, NumPy, Matplotlib
Databases	MySQL, MongoDB, Redis
Messaging and Auth	RabbitMQ, JWT
Data & Analytics	Power BI, Power Query, DAX, Data Cleaning, Feature Engineering, Visualization
AI/ML	RAG, Whisper, Vector Embeddings
Tools	Git, Docker, Jupyter, VS Code, Anaconda
Cloud Platforms	Google Cloud

CERTIFICATIONS

- Job Ready Data Science Course** | Instructor : Code With Harry | August 2026
- Python Bootcamp** | Instructor : Code With Harry | June 2026
